

## **“VIRUS” ROOM (Cell Lines facility)**

Virus usage:

**Only viruses of biosecurity level 1** are allowed in this room. Those viruses that require a superior biosecurity level can not be used here.

The room is equipped with all the material needed to work with virus and to discard the residues generated in this manipulation. **Before throwing the residues, these have to be inactivated with bleach.**

Viruses that were generated in this room will be able to use them in Primary Cultures and Organotypic cultures areas in the specific zones for that purpose.

As personal protection, it is mandatory to use lab coat and gloves, and mask if there is any risk of generating aerosols in the process. This material can't be used in other rooms in the Unit.

Cell lines using in this process have to keep free of mycoplasma as all the cells in the Unit.

This room has restricted access so the door has to maintain open as less as possible. It is totally forbidden enter with experimental animals, primary or organotypic cultures, bacteria or yeast, or any other organism that represent a risk for contamination.
